BACKGROUND

Janette Cachola, has worked in transportation planning and traffic engineering since 2001. Her expertise includes traffic impact analyses, traffic operations and queuing analysis, traffic signal warrant assessments, intersection capacity analysis, freeway mainline and ramp analyses, access evaluations, and parking studies. She has prepared technical studies for various planned developments throughout Southern California, which include a variety of residential, commercial, institutional and office uses. Janette routinely uses traffic forecasting and analysis tools such as Traffix, SYNCHRO (progression and queuing analysis), SimTraffic, HCS 2010, to perform level of Service (LOS) calculations and to measure the operational efficiency of networks under differing traffic loadings. She is also proficient in the use drafting software tools such as AutoCAD and AutoTurn.
